

MCR About Page

Technical Explanation and Wireframe Comparison

Selected wireframe: About Page from assets/newpage. The implementation creates a new about.html page and about.css stylesheet while reusing the existing base.css variables, navigation, footer, typography, and image treatment. The visual direction follows the wireframe structure: hero statement, large media block, foundation text with quote box, architect cards, archival timeline, press quote cards, and footer.

Implemented files

about.html, about.css, updated navigation/footer links in index.html, music.html, tour.html, and news.html.

CSS Grid usage

The page uses CSS Grid for the hero layout, foundation split, architect cards, timeline structure, and quote cards. Main grid classes include about-hero, foundation-grid, architect-grid, timeline-grid, timeline-item, and quote-grid.

Responsive behavior

Breakpoints at 980px and 680px convert multi-column grids into stacked mobile layouts. The timeline changes from a centered alternating grid into a left-rail timeline on small screens.

Design adaptation

The wireframe was kept as the structural source, while existing MCR concept assets and the black-white editorial style were used so the new page matches the current website project.

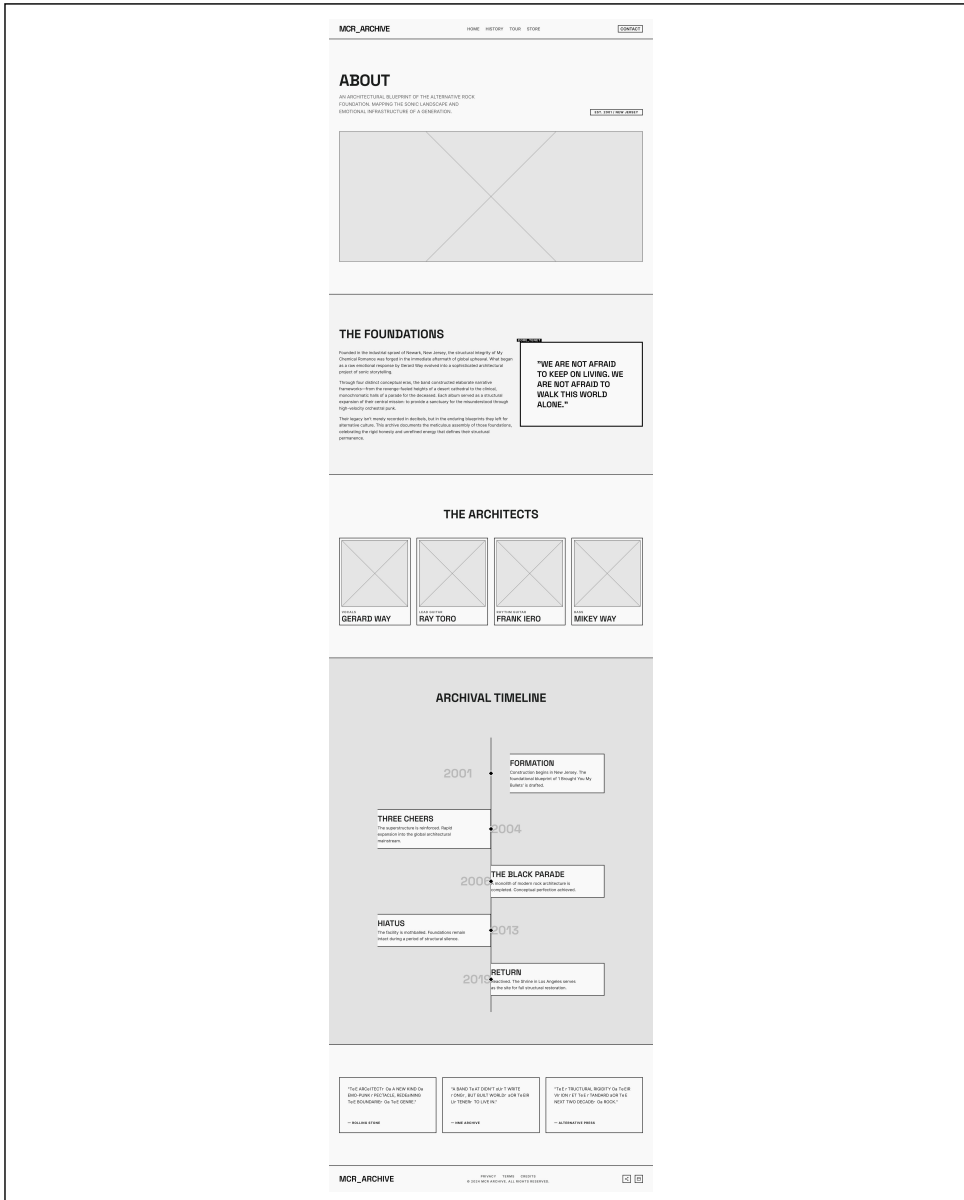

Screenshot method

The result screenshot was rendered from about.html at a 1440px desktop viewport. A separate mobile screenshot was also generated to verify that the layout remains readable.

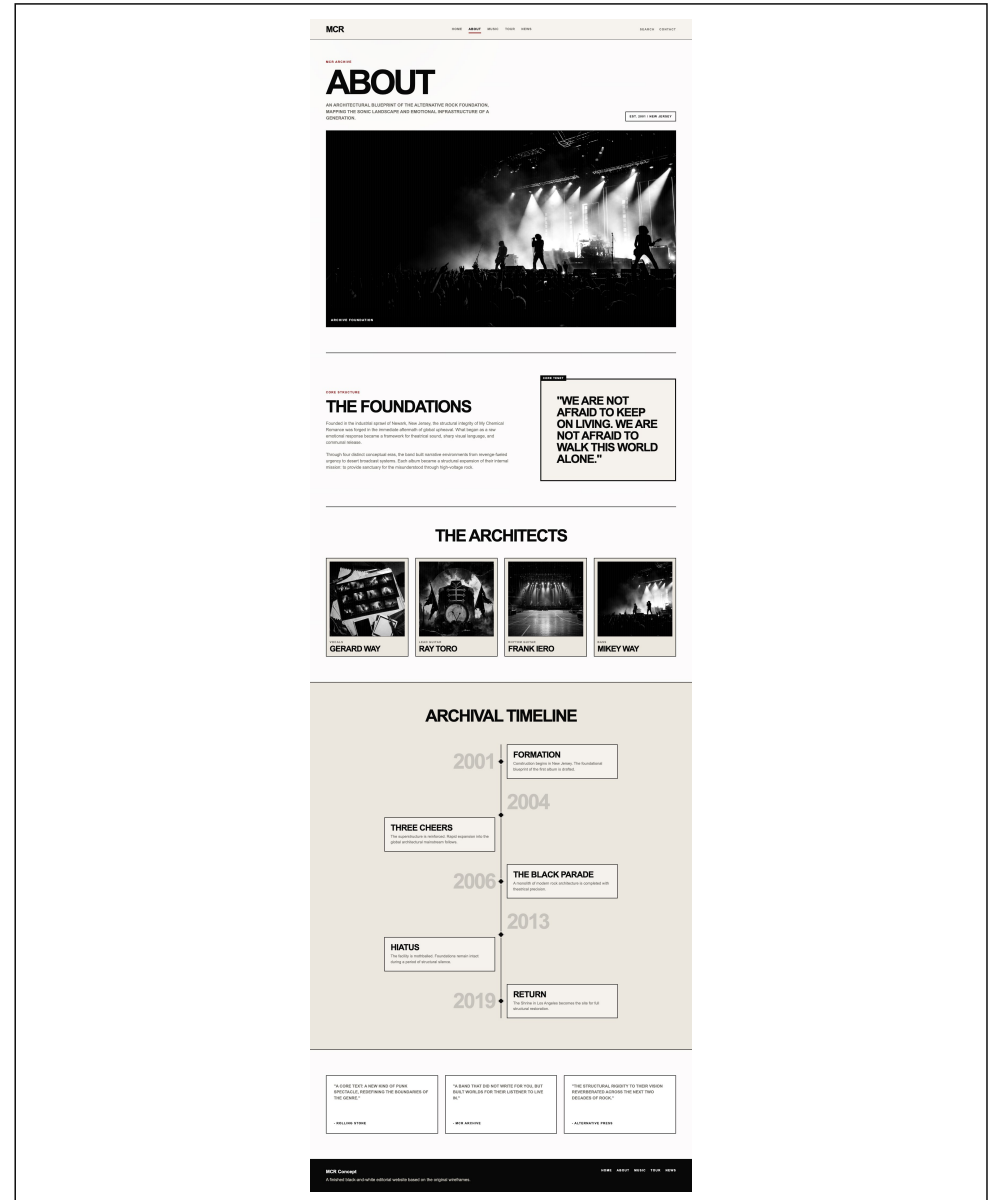

Full Page Side-by-Side

The complete wireframe and rendered web page are scaled into the same page for overall structure comparison.

THE ARCHITECTS

VOCALS

GERARD WAY

LEAD GUITAR

RAY TORO

RHYTHM GUITAR

FRANK IERO

BASS

MIKEY WAY

ARCHIVAL TIMELINE

2001

FORMATION

Construction begins in New Jersey. The foundational blueprint of 'I Brought You My Bullets' is drafted.

2004

THREE CHEERS

The superstructure is reinforced. Rapid expansion into the global architectural mainstream.

2006

THE BLACK PARADE

A monolith of modern rock architecture is completed. Conceptual perfection achieved.

2013

HIATUS

The facility is mothballed. Foundations remain intact during a period of structural silence.

2019

RETURN

The Shrine in Los Angeles serves as the site for full structural restoration.
