

MCR Added Pages

Technical Explanation and Wireframe Comparison

This document covers the three additional wireframes implemented after the About page: News Detail Page, Showcase Page, and Ticket Transaction Page. Each page is built as a standalone HTML file with its own scoped CSS file, while reusing the shared base.css design system, header, footer, typography, image treatment, and black-white editorial style.

Implemented files

news-detail.html and news-detail.css

showcase.html and showcase.css

ticket-transaction.html and ticket-transaction.css

Existing navigation and calls to action were updated to link Store, News Detail, and Ticket Transaction.

CSS Grid usage

The new pages use CSS Grid for the article/sidebar layout, product/filter grids, featured merch split, checkout stepper, checkout form sections, seat selection, and summary layout.

Responsive behavior

Desktop layouts match the wireframe proportions, while mobile breakpoints stack sidebars, product cards, form fields, and checkout summaries without horizontal overflow.

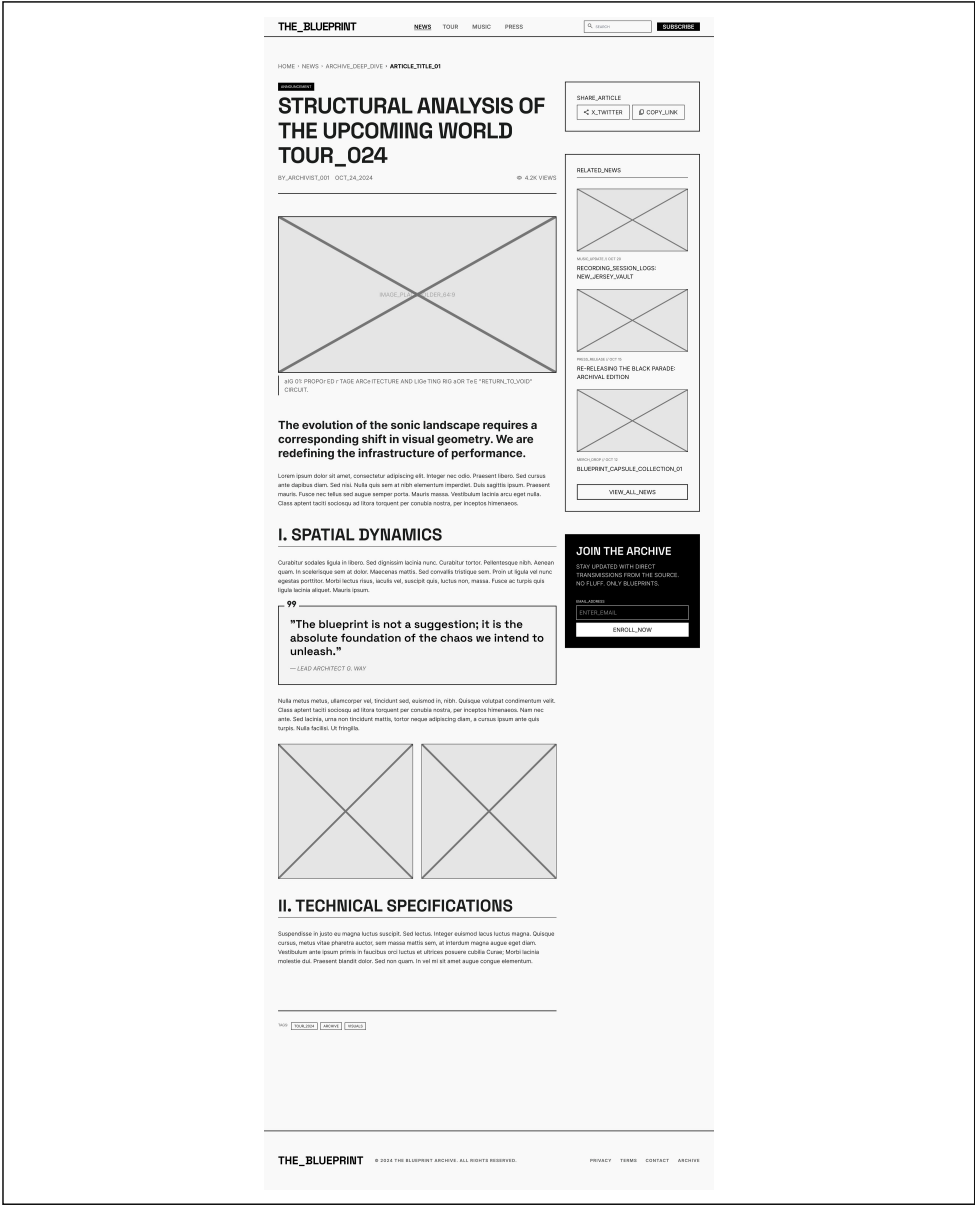

Verification

Desktop and mobile screenshots were rendered for all three pages. The measured scrollWidth matched the viewport width on every page.

News Detail Page

Two-column news article layout with hero image, article body, related-news sidebar, share actions, and newsletter panel.

Wireframe

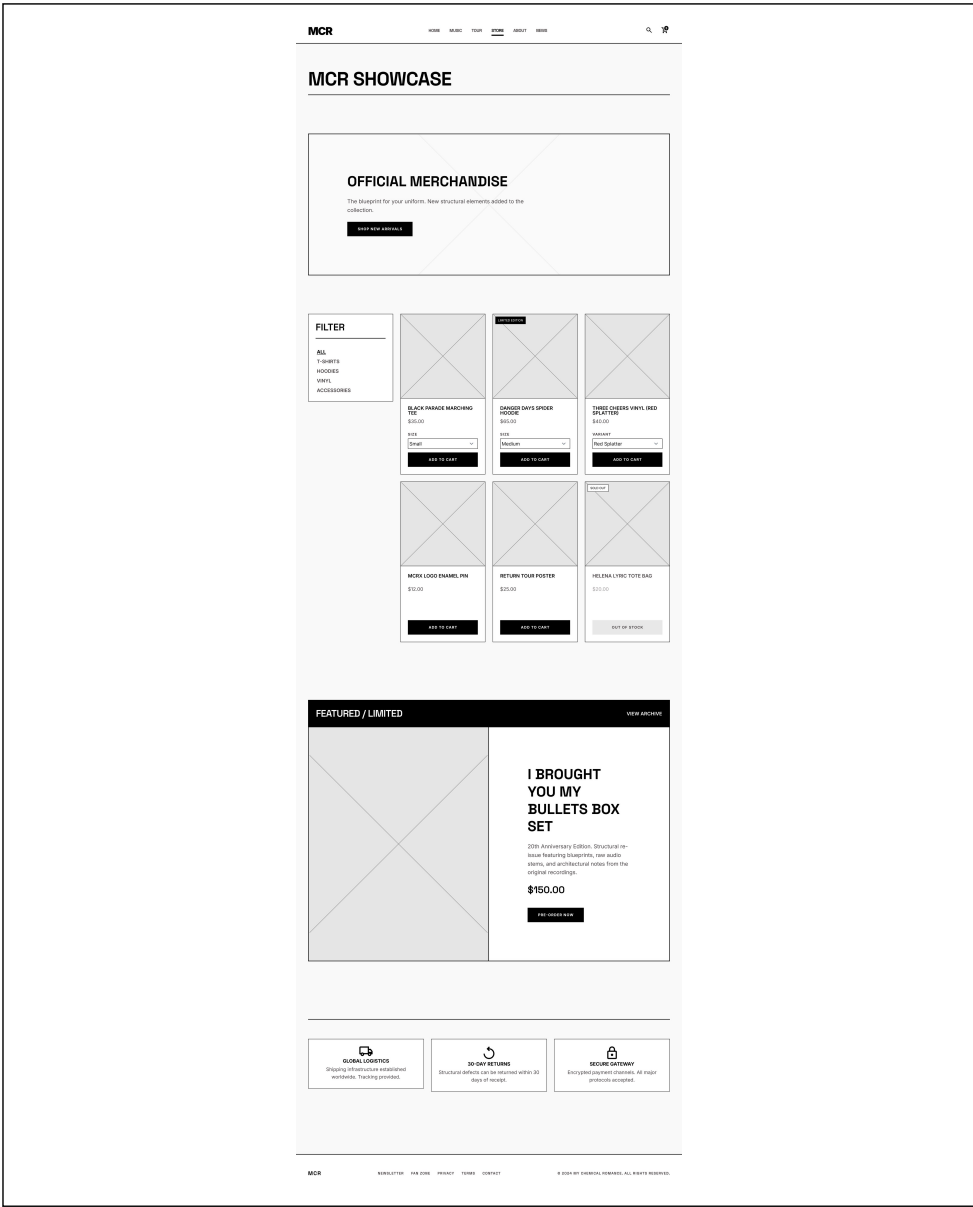

Implemented Page

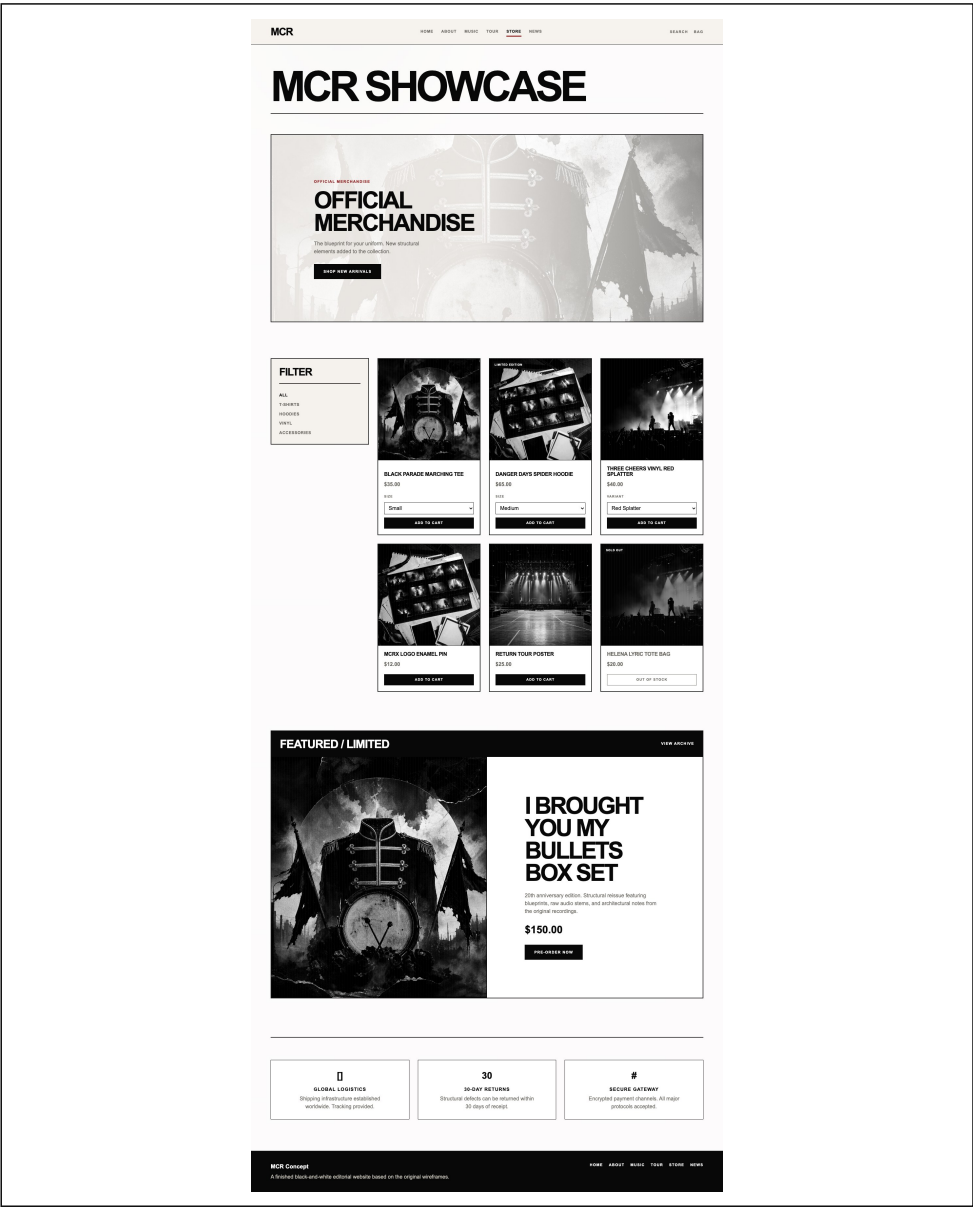

MCR Showcase Page

Store layout with merchandise hero, filter sidebar, product grid, featured limited product, and service cards.

Wireframe

Implemented Page

Ticket Transaction Page

Checkout flow with progress stepper, event summary, seat selection, delivery, contact/payment forms, timer, and order summary.
